New studies on psychopathy are being published at an ever increasing rate. In the past, a large update would be done to our reference list every few months, with each update including between 125-180 new references. New references will now be posted here as they become available. A major update to our Main Reference List and Download files will be done every few months.

**MAIN REFERENCES**

This reference list was compiled by Kylie Neufeld for Robert Hare’s personal use. We are currently in the process of adding links to available abstracts, and in some instances, links to the full text (search for [full text]). A PDF (2 MB) copy of this reference list is available for download. Note: the reference list you download may be slightly different from the list below, although we do our best to keep them both current.

*Updated December 9, 2010 (59 references were added).*
